Dave,

No, I do not have any additional comments. As I mentioned to you during our early March meeting, ODNR is fine with the addition of the 8 turbines within the existing boundary. As the USFWS recommended in their letter dated March 24, 2011, we would also recommend (1,000 feet) set-backs to the forested areas to avoid potential impacts to Indiana bats.

Please let me know if you have any further questions.

Thanks,
Jennifer

Jennifer –

Do you have any feedback on our 8 turbine amendment on the Blue Creek Wind Farm Project.

Thanks,
Dave
